# **INTRODUCTION** SECTION - A

# **INTRODUCTION**

An accounting system is the means by which financial transactions are planned, captured during the actual operation of the school system, recorded in the books of accounts, and then analyzed to produce the various reports for management, financial status and accountability. The structure outlined in the Financial Planning, Budgeting and Reporting System for Alabama Public Schools will provide a classification structure that will meet the school systems' needs and will provide comparable data when reports from the different school systems are combined.

#### PURPOSE

A significant portion of the financial resources used by a school system is obtained through the exaction of private property in the form of taxes. With this seizure of property for public use comes a demand for a high degree of accountability. Poor accounting and financial reporting practices provide fuel for the critics to attack the handling of these entrusted resources. The accounting system outlined in this manual will provide the tool for the school systems in the State of Alabama to provide an accounting and financial reporting framework that will satisfy the requirements of fiscal integrity and accountability.

#### **BASIC PHILOSOPHY**

The basic philosophy of the accounting system contains criteria to support the systems' needs mentioned above.

1. The classification of accounts and the reporting structure remains in accordance with generally accepted accounting principles.

2. The account classification system is flexible to meet the needs of both small and large school systems while retaining comparability of collected and reported data.

3. The account structure encourages comprehensive full disclosure of the financial position of the reporting school system. Each system will incorporate all financial activities into a single accounting and reporting system and place emphasis on timely and accurate recording of financial transactions.

4. The financial reporting system emphasizes the results of the school system by using program accounting with the application of support service cost to the educational cost centers and instructional programs.

5. By use of cost center budgeting of expenditures and certain revenues, the accounting system encourages site-based management of financial resources.

6. Along with site-based management, program accounting and budgeting of revenues, the accounting systems provides the tool needed to accomplish required financial accountability reporting.

#### **BASIS OF ACCOUNTING**

The basis of accounting refers to the point of time when revenues, expenditures, and the related assets and liabilities are recognized in the accounts and reported in the financial statements. There are three(3) methods of accounting commonly used by school systems that will be explained below.

1. CASH-BASIS ACCOUNTING recognizes transactions when cash is received or disbursed. The greatest weakness of the cash basis of accounting is that it does not recognize accounts receivable, accounts payable and other accrued items. It therefore does not match resources used to resources provided.

2. MODIFIED ACCRUAL-BASIS ACCOUNTING recognizes transactions when they become both measurable and available for use or collection within the reporting fiscal period.

3. ACCRUAL-BASIS ACCOUNTING recognizes transactions when they occur, regardless of the timing of the related cash transaction.

It is recommended that modified-accrual or accrual-basis accounting be used to the fullest extent practicable. The use of these methods allows the school system to determine its financial position and results of operations by measuring financial resources and obligations at the earliest possible date and provides for comparable period-to-period reports.

#### CONCLUSION

Fund accounting was originally developed in response to the demand for greater financial accountability on the part of state government and local school systems. What began as a system of separate cash accounts has evolved into the current system of separate accounting for separate activities. Indeed, a school system is not considered to be a single entity for accounting and financial reporting purposes, but rather a collection of separate accounting entities for funds, cost centers, funding sources, and programs.

# ACCOUNTING SYSTEM COMPONENTS

## **SECTION - B**

# ACCOUNTING SYSTEM COMPONENTS

The system component structure is designed to serve as a flexible tool to meet the needs of all school systems in the State of Alabama. It creates a common means of communication to be used in planning, recording, accumulating, controlling, and reporting the financial activities of the school systems. All school systems should uniformly utilize this component structure in order to provide comparability between school systems.

### **DEFINITION OF COMPONENTS**

#### 1. FUND TYPE & ACCOUNT GROUP------

There are four fund types and two account groups, which should be used to record all related financial transactions.

#### 2. ACCOUNT TYPE------

This one (1) digit component is used to designate the five (5) major account types used in an automated accounting system. Its use allows for a greater range of numbers and detail in the revenue and expenditure account codes.

#### 3. ACCOUNT CODE-----

The account code component is used to designate balance sheet (assets, liabilities, and fund equity), revenue and expenditure accounts.

#### 4. OBJECT-----

The object of expenditure component is used to classify in detail the services or commodities bought from the financial resources in the fund source from which the expenditure is being made.

#### 5. COST CENTER------

A cost center is a budgetary or operational unit to be used in routing financial resources and segregating expenditures.

#### 6. FUND SOURCE------

A fund source is a fiscal and accounting entity with a self-balancing set of accounts recording financial resources, related liabilities, fund equity, and changes caused by the receipt of revenues and the expenditure of funds. This component is used to maintain "fund accounting" in accordance with Section 1300 of the <u>Codification of Governmental Accounting and Financial Reporting Standards</u> published by GASB.

#### 7. APPROPRIATION YEAR-----

The appropriation year component is used to assist with processing activities that are to be routed to specific funding years.

#### 8. PROGRAM------

A program is a plan of activities and procedures designed to accomplish a predetermined objective or set of objectives. The use of this component allows certain support service cost to both the program and the function of expenditure to be classified concurrently.

#### 9. SPECIAL USE-----

The special use component can be used to obtain a greater breakdown of any other of the components used in the accounting entity. It should be used only when restrictions on other components do not allow for their adaptation or modification.

# FUND TYPE & ACCOUNT GROUP COMPONENT SECTION - C

# FUND TYPE & ACCOUNT GROUP COMPONENT

A fund type is defined as a fiscal and accounting entity with one(1) or more fund sources containing a self balancing set of accounts recording financial resources, related liabilities, fund equity, and changes caused by the receipt of revenues and the expenditure of funds. An account group is an accounting entity with a self-balancing set of account records of general fixed assets and general long-term debts.

This two (2)-digit code in the accounting system component structure will identify the major fund types or account group classification and the specific individual fund type or account group.

Accounting transactions are recorded into four (4) major classifications:

#### GOVERNMENTAL FUND TYPES PROPRIETARY FUND TYPES FIDUCIARY FUND TYPES ACCOUNT GROUPS

These four (4) major classifications are divided into the following categories, called fund types and account groups. The fund type to be used is determined by the nature and purpose of the revenue to be recorded. The revenue section of this manual will be used to indicate the desired fund type to be used to record the transaction related to the revenue source.

<b>GOVERNMENTAL FUND TYPES</b> (10-19)			
General		11

### **DEFINITIONS FOR FUND TYPE** & ACCOUNT GROUP CODES

The accounting system for schools should be organized and operated on a fund (fund source) basis. Each fund (fund source) must be so accounted for that the identity of its resources, obligations, revenues, expenditures, and fund equities is continually maintained. Only the minimum number of funds (fund sources) consistent with legal and operating requirements should be established since unnecessary funds (fund sources) result in inflexibility, undue complexity, and inefficient financial administration. The fund type component is to be used to group these funds (fund sources) into major classifications.

#### GOVERNMENTAL FUND TYPES

These fund types are the segment of the accounting system through which most school system functions are typically financed. The reporting focus of these fund types is to determine financial position through the recording of changes caused by the receipt of revenues and the expenditure of resources rather than determining net income or loss.

#### GENERAL

This fund type accounts for all financial resources of the school system except those required to be accounted for in another fund type. The primary operating functions of a local school system are performed in the general fund type. EXAMPLE: Foundation Program Funds: 11-X-XXXX-XXXX-1110-X-XXXX-XXXX

#### SPECIAL REVENUE

This fund type accounts for the proceeds of specific revenue sources that are legally restricted to expenditures for specific purposes except those required to be accounted for in some other predetermined fund type. The integrity of the individual special revenue will be maintained by the use of the Fund Source component.

The State Department of Education will identify the state revenue sources requiring special revenue status. Most federal grant appropriations will be maintained as special revenues, especially where separate budgeting and financial reporting is required at the state or federal level. Any local revenue sources requiring special revenue status will be determined by the local school system, using the guidelines contained in this section of the manual.

EXAMPLE: Title I Funds: 12-X-XXXX-XXX-XXX-4510-X-XXXX-XXXX

#### DEBT SERVICE

This fund type accounts for the accumulation of resources for the payment of general long-term debt, both principal and interest.

When financial resources are legally required to be set aside in a sinking fund to meet current and(or) future principal and interest obligations of a school system's general long-term debt, the debt service fund type should be used to account for these obligations and resources. Not all long-term debt obligations and resources are required to be recorded in a debt service fund type. Only long-term obligations involving a third party or paying agent should be recorded in this fund type. Capital leases, lease purchases and other intermediate term leases can be budgeted and accounted for within the fund type creating the obligation and supplying the resources for the payments of principal and interest.

The special reporting components of the accounting system are to be used to maintain the integrity of each debt service occurrence within the debt service fund type. EXAMPLE: Debt from Local Tax Fund: 13-X-XXXX-XXXX-6030-X-XXXX-XXXX

#### **CAPITAL PROJECT**

This fund type accounts for financial resources used to acquire or construct major capital facilities other than those of proprietary and trust fund.

When financial resources are obtained through borrowing or contributions for the purpose of acquiring and (or) constructing major capital facilities, a capital project fund type should be used to record transactions related to the accumulation and expenditure of these financial resources.

The special reporting components of the accounting system are to be used to maintain the integrity of each project's financial resources within the capital project fund type. EXAMPLE: PSF - Capital Projects: 14-X-XXXX-XXXX-XXXX-2120-X-XXXX-XXXX

#### PROPRIETARY FUND TYPES

This fund type is used to account for school system activities that are similar to business operations in the private sector, or where the reporting focus is on determining net income, financial position and cash flows and when the activity is to be self supporting.

It is recommended that proprietary fund types be used when the school system conducts business type activities that receive a significant portion of their financial resources through user charges.

#### **ENTERPRISE**

This fund type accounts for operations that are financed and operated in a manner similar to private business enterprises where the stated intent is that the cost, including expenses for depreciation and indirect cost of providing goods or services to students or the general public on a continuing basis are financed or recovered primarily through user charges. NOTE: Enterprise fund types are fee supported.

The special reporting components of the accounting system are to be used to maintain the integrity of each project's financial resources within the enterprise fund type. EXAMPLE: Summer School Fund: 21-X-XXXX-XXXX-6922-XXXX-XXXX

#### INTERNAL SERVICE

This fund type accounts for the operation of school system functions that provide goods or services to other school system functions, other school systems, or other governmental units on a cost-reimbursable basis. NOTE: Internal Service fund types are supported by user charges.

The chief aim of an internal service fund type is cost reimbursement. Therefore, an internal service fund type should only be used if the school system intends to recover the full cost of providing the service through user charges.

The fund source component of the accounting system is to be used to maintain the integrity of each project's financial resources within the internal service fund type. EXAMPLE: Print Shop Fund: 22-X-XXXX-XXX-XXXX-6999-XXXX-XXXX

#### **FIDUCIARY**

This fund type is used to account for assets held by the school system as trustee or agent. Expendable trust fund sources are accounted for in essentially the same manner as governmental fund sources. Non-expendable trust fund sources are accounted for in essentially the same manner as proprietary fund sources. Agency fund sources are purely custodial (assets equal liabilities) and thus do not involve measurements of results of operations.

#### TRUST

This fund source accounts for assets held by a school system in a trustee capacity for individuals, private organizations, other governmental units, and/or other fund types.

#### Non-expendable Trust

This fund type accounts for financial assets held in trust for some specified purpose in which only the investment earnings on the asset, not the asset itself, may be expended. When the financial resources held in trust by the school system are for a specified purpose and the school system is permitted to spend only the earnings of the assets held, the non-expendable trust fund type should be used to account for such endowment arrangements.

The fund source component of the accounting system is to be used to maintain the integrity of each endowment's financial resources within the non-expendable trust fund type.

EXAMPLE: Education Trust: 31-X-XXXX-XXX-XXXX-6940-XXXX-XXXX

#### **Expendable Trust**

This fund type accounts for financial assets held in trust for some specified purpose where the trust fund is designed to provide stewardship over the expendable

asset. An expendable trust fund type functions similar to a governmental fund type. When the financial resources held in trust by the school system are for a specified purpose and the school system is permitted to spend all the assets and earnings of the trust, the expendable trust fund type should be used to account for such endowment arrangements.

The fund source component of the accounting system is to be used to maintain the integrity of each endowment's financial resources within the expendable trust fund type.

EXAMPLE: Scholarship Fund: 32-X-XXXX-XXX-XXXX-6940-XXXX-XXXX

#### AGENCY

This fund type accounts for assets held solely in a custodial capacity. Accordingly, assets in agency fund types are always matched by liabilities to the owners of those assets. Agency fund sources do not report operations and use only balance sheet accounts.

When a school system plays a limited role in the collecting or temporarily holding of financial resources on behalf of some third party, an agency fund type should be used to account for these resources

EXAMPLES: If the school system uses clearing funds for the payroll and accounts payable transactions, the fund type codes 38 for the Payroll Clearing and 39 for the Accounts Payable Clearing have been assigned by the State.

#### ACCOUNT GROUPS

Sets of accounts used to record and control the school systems' general fixed assets and unmatured general long-term liabilities are organized in account groups. Account groups are not funds and do not report operations since they do not contain revenue or expenditure accounts. They are simply lists of the accumulated cost/values of fixed assets and obligations of long-term debt of the school system. Changes to these fixed assets and long-term debt are disclosed in the notes to the financial statements rather than in an operating statement.

#### **GENERAL FIXED ASSET**

The general fixed asset account group is used to record the cost of all property, plant and equipment, other than those accounted for in the proprietary or non-expendable trust fund types.

EXAMPLE: An account group number 88 should be used to record the general fixed assets of the school system. This account group will be used as a control account for reporting the accumulated cost/values of the fixed assets of land, land improvements, buildings, building improvements, equipment, construction in progress, capital leases and other fixed assets.

NOTE: Additional fixed assets accumulated during the year should be included in the Financial Statements annually and any items destroyed, lost or stolen should be deleted annually. An itemized list should be maintained each year of changes in the fixed assets.

#### **GENERAL LONG-TERM DEBT**

The general long-term debt account group is used to record the unmatured principal amount of all long-term liabilities excluding those of Proprietary and Fiduciary funds.

EXAMPLE: An account group number 89 should be used to record the general long-term debt of the school system. This account group will be used to report the outstanding principal balance of the long-term debt for the obligations of bonds, warrants, warrant anticipation notes, capital leases, and compensated absences.

# ACCOUNT TYPE COMPONENT

## **SECTION - D**

# ACCOUNT TYPE COMPONENT

The account type component is used in conjunction with the account code component to identify the five (5) major account types used in an automated accounting system. This code allows for a greater range of numbers to be used in the account code component. The five (5) major account types are assets, liabilities, fund equity, revenues and expenditures

# ACCOUNT TYPE CODES

ASSETS	1
LIABILITIES	2
FUND EQUITY	3
REVENUES	4
EXPENDITURES	5

### DEFINITIONS AND PROCEDURES FOR ACCOUNT TYPE CODES

#### ASSETS

When balance sheet account codes for assets are used in the account code component of the accounting system, a one (1) should be used to identify the code as an asset. The asset account codes that require a "1" range from 0100 through 0199.

#### LIABILITIES

When balance sheet account codes for liabilities are used in the account code component of the accounting system, a two (2) should be used to identify the code as a liability. The liability account codes that require a "2" range from 0200 through 0299.

#### **FUND EQUITY**

When balance sheet account codes for fund equity are used in the account code component of the accounting system, a three (3) should be used to identify the code as a fund equity. The fund equity account codes that require a "3" range from 0300 through 0399.

#### REVENUES

When revenue account codes are used in the account code component of the accounting system, a four (4) should be used to identify the code as a revenue. The revenue account codes that require a "4" range from 1000 through 9999.

#### **EXPENDITURES**

When function of expenditure account codes are used in the account code component of the accounting system, a five (5) should be used to identify the code as an expenditure. The function of expenditure account codes that require a "5" range from 1000 through 9999.

# BALANCE SHEET ACCOUNTS

**SECTION - E-1** 

### BALANCE SHEET ACCOUNTS

Balance sheet accounts are required for fund sources that require year-end reconciliation and/or are allowed to carry over balances to the following fiscal year. Most State and Federal revenues require balance sheet accounts for each individual revenue or fund source in order to maintain a complete set of accounts for "fund accounting" purposes.

Balance sheet accounts are organized and classified by the following account code groups:

ASSETS	0100-0199
LIABILITIES	0200-0299
FUND EQUITY	0300-0399

# **DEFINITIONS OF ASSET CODES**

0110-0119	CASH	Currency on hand or on deposit at banking institutions that is available for use by the school system.
0111		<b>Cash in Bank (Operating Account)</b> Financial resources on deposit in a banking institution for payment of checks, drafts and other general obligations of an operations fund.
0112		<b>Cash in Bank (Specify)</b> Financial resources on deposit in a banking institution for designated purposes or that have characteristics different from the resources for general operations.
0113		<b>Cash Equivalents</b> Short-term highly liquid investments that are readily convertible to known amounts of cash and mature in a short period of time (usually ninety (90) days or less) including treasury bills, commercial paper and money market funds.
0114		Cash with Fiscal Agent Deposits with fiscal agents such as banks for paying matured bonds and interest.
0115		Change Cash A sum of money set aside to provide change. Examples of change cash are for lunchroom and athletic events.
0116		Petty Cash A sum of money set aside for paying small obligations when the issuance of a check is not cost-effective.
0118		<b>Cash Short or (Over)</b> The difference between the amount indicated as collected and the amount deposited by the school. This account can be used during the year to record discrepancies in deposits, but efforts must be made to account for said discrepancies. This account should be closed out before year-end close.
0119		Other Cash Deposits, cash or cash equivalents that cannot be classified in the above accounts. When this account is used, a footnote or schedule should be attached to the financial statement identifying the items entered.
0120-0129	INVEST	<b>TMENTS</b> Securities held for producing income in the form of interest. Separate accounts for each category of investments may be maintained.
0121		<b>Investments (Current)</b> Securities and certificates of deposit invested for longer than 90 days that are expected to be held for less than one year and that generate revenue in the form of interest or dividends.
Revised: Janua	ary 25, 2	2023

\*The use of codes designated

0122	Investments (Non-current) Securities, real estate and certificates of deposit that are held for more than one year and that generate revenue in the form of interest, dividends, rentals or lease payments.
0125	<b>Unamortized Premium on Investments</b> The excess of the amount paid for securities over the face value, which has not yet been amortized.
0126	Unamortized Discount on Investments (Credit Balance) The excess of the face value of securities over the amount paid for them, which has not yet been written off.
0129	Other Investments Any other securities held for producing income in the form of interest that cannot be classified in one of the above. When this account is used, a footnote or schedule should be attached to the financial statement identifying the items entered.
0130-0139 RECEI	VABLES Amounts of financial resources that are earned but awaiting receipt from others.
0131	Accounts Receivable Amounts owed the school system on open accounts from private individuals and nongovernmental organizations for goods or services furnished by the LEA.
0132	Interest Receivable Interest earned, but not received, on investments or other assets.
0133	Interfund Receivable Amounts that are due, other than charges for goods and services rendered, to a particular fund from another fund in the school system and that are to be received within one year.
0134	Intergovernmental Receivable Amounts due the reporting school system from another government. These amounts may represent intergovernmental grants, entitlements, shared revenues, appropriations or allotments; or may represent taxes collected for the reporting school system by an intermediary collecting government, loans, or charges for goods or services rendered by the reporting school system for another government.
0135	Notes Receivable A legal right to receive payment of a certain sum of money on demand or at a fixed or determinable time based on an unconditional written promise signed by the maker.
0136	Rent Receivable Amounts due to a fund pursuant to operating leases and rental agreements.
0137	Returned Checks Receivable
Revised: January 25, 2023 *The use of codes designated	

	Amounts owed the school system for checks returned for insufficient funds from banking institutions. It is recommended that subsidiary records be kept to identify individuals liable for the returned checks so collections can be made. This account can be used during the year to record returned checks, but must be closed out into a revenue or expenditure before year end close.
0138	Allowance for Doubtful Accounts Amounts considered to be uncollectible. This account is to be used only in Proprietary Funds and will carry a credit balance.
0139	Other Receivables Any other amount of financial resources that are earned but awaiting receipt from others. When this account is used, a footnote or schedule should be attached to the financial statement identifying the items entered.
0140-0149	INVENTORIES
0141	Inventories - Materials & Supplies Nonfood materials and supplies on hand held for future consumption. (Example: office supplies or maintenance supplies)
0142	Inventories - USDA Commodities USDA donated commodity food on hand held for future consumption.
0143	<b>Inventories - Food</b> Food on hand held for future consumption.
0144	Inventories - Fuels & Lubricants Items on hand held for future use.
0146	Inventories - Instructional Materials & Supplies Instructional materials and supplies on hand held for future consumption by teachers in the instructional programs.
0149	Other Inventories Any other type of items carried on inventory by the school system that cannot be recorded in the above classifications. Any material balance of inventory should be kept as a separate line item. When this account is used, a footnote or schedule should be attached to the financial statement identifying the items entered.
0150-0159 0151	OTHER ASSETS Prepaid Items Payments made for benefits not yet received. Prepaid items, e.g. prepaid rent and unexpired insurance premiums, differ from deferred charges in that they are spread over a shorter period of time and are regularly recurring costs of operation.

0152	Deferred Charges Expenditures/expenses that are not chargeable to the fiscal period in which they were made but that are carried as an asset on the balance sheet pending amortization or other disposition. These costs include those incurred in connection with the issuance of debt, e.g. bond issuance, underwriting and legal fees.
0153	Deferred Compensation Plan Assets The assets and related earnings held for participants in IRS Section 457 deferred compensation plans. (Agency funds only)
0159	Other Assets Any other asset that cannot be recorded in the above classifications. When this account is used, a footnote or schedule should be attached to the financial statement identifying the items entered.
0170-0189 FIXED	ASSETS
0171	Land Land purchased or otherwise acquired by the school system. This account includes costs incurred in preparing land for use and acquisition costs.
0172	Land Improvements Permanent improvements other than buildings that add value to land, e.g. fences, retaining walls, sidewalks, pavements, gutters, tunnels and bridges.
0173	Buildings Permanent structures purchased or otherwise acquired by the school system.
0174	<b>Building Improvements</b> Permanent improvements that add value to buildings.
0175	<b>Furniture &amp; Equipment</b> Tangible personal property of a more or less permanent nature.
0176	Vehicles Automotive equipment requiring a vehicle license tag which is used in carrying out operations. (Examples: trucks, cars, buses, etc.)
0177	<b>Construction in Progress</b> The cost of construction undertaken but not yet completed. Upon completion this cost should be moved to the appropriate code. e.g. Buildings or Building Improvements.
0178	Assets Under Capital Leases Assets purchased under an installment purchase agreement or contract. Assets are recorded at the amount equal to the present value of the minimum lease payments at the inception of a capital lease; however, the amount recorded cannot exceed the fair value of the leased property.
0188	Accumulated Depreciation (Credit Balance)

	The accumulation of systematic and rational allocations of the estimated cost of using fixed assets on a historical cost basis over the useful lives of the fixed assets. For use in Proprietary Fund types.
0189	Other Fixed Assets Any other fixed asset that cannot be recorded in the above classifications. When this account is used, a footnote or schedule should be attached to the financial statement identifying the items entered.
0190-0199 OT 0191	THER DEBITS Amounts Available inFund Source An "other debit" account in the general long-term debt account group designating the amount of assets available in governmental funds for the retirement of general long-term liabilities recorded in the General Long-Term Debt Account Group.
0192	Amounts to be Provided An "other debit" account in the general long-term debt account group representing the amount to be provided to liquidate general long-term liabilities.
0199	Other Debits When this account is used a footnote or schedule should be attached to the financial statement identifying the items entered.

## FUNCTIONS OF EXPENDITURE ACCOUNT CODES

**SECTION - E-3** 

## FUNCTION OF EXPENDITURE ACCOUNT CODES

The Function of Expenditure account codes describe the activities being performed for which a service or material object is acquired. In determining the function code, attention should be focused on the <u>specific activity</u> <u>being performed</u> and <u>not the program which will be benefited</u>. See the definition of program codes to further distinguish these two separate codes.

## DEFINITIONS OF FUNCTION OF EXPENDITURE ACCOUNT CODES

#### 1100 INSTRUCTIONAL SERVICES

Instructional activities dealing directly with the interaction between teachers and students. Teaching may be provided for pupils in a school classroom, in another location such as a home or hospital and in other learning situations such as those involving co-curricular activities (Co-curricular includes such activities as field trips, athletics, band and school clubs - NOTE: Transportation cost for these activities should be coded under the transportation code of 4150). It may also be provided through some other approved medium such as television, radio, telephone, computers and other areas of technology. Also included here are the activities of classroom assistants of any type and substitute teachers which directly assist in the instructional process. This function should include the purchase of instructional furniture and equipment, and the repairs and maintenance for this equipment.

### 2100-2390 INSTRUCTIONAL SUPPORT SERVICES

Those services or activities providing supervision and/or technical and logistical support to facilitate and enhance instruction. Such services will include student support, instructional staff support, educational media and local school administration.

#### 2110-2190 Student Support Services

2110	Attendance Services
	Activities associated with recording and reporting student attendance data, promptly identifying nonattendance patterns, promoting improved
	attitudes toward attendance, analyzing causes of nonattendance and enforcing compulsory attendance.
2120	Guidance & Counseling Services
	Activities involving counseling with students and parents; consulting with other staff members on learning problems; evaluating the abilities of students; assisting students as they make their own educational and career plans; providing referral assistance; and working with other staff members in planning and conducting guidance programs for students
2130	Testing Services
	Activities concerned with administrating standardized tests and any other tests that measure ability, aptitude, achievement, interests and personality.
2140	Health Services
	Physical and mental health services which are not direct instruction. Included are activities that provide students with appropriate medical, dental and nursing services.
2150	Social Services
	Activities such as investigating and diagnosing student problems arising out of the home, school or community.
2160	Work Study Services
	Activities involved with the handling of student work study programs.
2170	Psychological Services Activities concerned with interpreting the results of testing services;
	gathering information about student behavior; and working with staff members in planning school programs for psychological services.

#### Note: Policy on Capitalization or Expensing of Software Cost

Generally, software should not be capitalized and thus should not be included in the General Fixed Asset Account Group. In some instances, computer hardware and software are purchased as a package and the specific costs for hardware and software are inseparable. In such case, the total cost should be capitalized and included in the General Fixed Asset Account Group. Another exception to the above rule pertains to those costs incurred to purchase or develop computer software products that are to be used for producing income. FAS-86 requires the costs related to income-producing software to be capitalized and included in the Board's General Fixed Asset Account Group.

### DEFINITIONS OF COST CENTER CODES

A cost center code is required to be used on all expenditure transactions of the school system. As expenditure transactions are recorded, they should be direct charged to the applicable school site or vocational cost centers. Expenditures which are not charged to a specific site should be charged to a cost center pool. Cost center codes must be used with revenue accounts only when budgeting is required for a revenue being restricted for a designated school site.

0000	NO COST CENTER REQUIRED This cost center designation can only be used with balance sheet (assets, liabilities and fund equity) and revenue accounts that are not designated for a specified cost center.
0001	NON-SCHOOL SITES (Special Population) This cost center designation should be used for small groups of special population students housed at non-school sites.
0002-5000	SCHOOL SITES This range of cost center codes should be used to accumulate cost by the attendance site code assigned by the State of Alabama.
6000-6999	<b>VOCATIONAL CENTERS</b> This range of cost center codes should be used to accumulate cost by the vocational site code assigned by the State of Alabama.
8000-8999	<b>COST CENTER POOLS</b> This range of cost center codes can be used by the school system to accumulate costs that are generally system-wide in nature and cannot be feasibly charged directly to a school site code when the transaction occurs.
8100	Instructional Services Instructional activities dealing directly with the interaction between teachers and students which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
8200-8299	Instructional Support Services Services or activities providing supervision, technical and logistical support to facilitate and enhance instruction which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
8210-8	Student Support Services Activities designed to assess and improve the well being of students and supplement the teaching process which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
8220-8	229 Instructional Staff Support

8230-8239	Activities associated with assisting the instructional staff with the content and process of providing learning experiences for students which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred. School Administrative Services Activities concerned with the overall administrative responsibilities for a school which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
8300-8399	Operation & Maintenance
	Activities concerned with keeping the physical plant open, comfortable and safe for use, and keeping the grounds, buildings and equipment in effective working condition and good state of repair which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
8400-8499	Auxiliary Services
	Activities or services functioning in a subsidiary capacity and lending assistance to the education process which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
8410-8419	Student Transportation
8420-8429	Activities concerned with conveying students to and from school and on trips to school sponsored activities which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred. Food Service Operations
0420-0423	Activities concerned with providing food in a school which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
8600-8699	<b>General Administrative Services</b> General administrative services including the Board of Education, Superintendent, other executive administration, business and central support which are system wide in nature and cannot be feasibly charged to school site cost centers at the time the cost is incurred.
9000-9997 NON-R	EGULAR INSTRUCTIONAL
	This range of cost center codes should be used to accumulate costs for non-regular instructional functions, sites or programs. Non-Public School, Adult Education, Community Education, and expenditures for capital outlay and debt service are examples of non-regular instructional programs.

# FUND SOURCE COMPONENT

**SECTION - H** 

## **FUND SOURCE COMPONENT**

A fund source is a fiscal and accounting entity with a self-balancing set of accounts recording financial resources, related liabilities, fund equity, and changes caused by the receipt of revenues and expenditures of funds. This component is used to maintain "fund accounting" in accordance with Section 1300 of the Codification of Governmental Accounting and Financial Reporting Standards published by GASB.

The four (4) digit fund source code in the accounting system will identify the following major categories:

STATE SOURCES	1000-2999
FEDERAL SOURCES	3000-5999
LOCAL SOURCES	6000-7999
OTHER SOURCES	8000-8999
OTHER FINANCING SOURCES	9000-9997

### DEFINITIONS OF FUND SOURCE CODES

A fund source code is required to be used, along with the appropriation code, on all transactions to maintain "fund accounting".

In each of the following major fund source codes the specific revenue code can be obtained from the revenue section of this manual. However, a number of revenues may be accounted for in a single fund source if separate "fund accounting" is not required for that particular revenue.

0000	<b>NO FUND SOURCE REQUIRED</b> This code can be used when no revenue accounts are used in a set of accounts. Examples of this type of transaction occur in the Agency Fund types and the Account Groups for General Fixed Assets and Long-Term Debt
1000-2999	<b>STATE SOURCES</b> This range of fund source codes should be used when state revenues require "fund accounting". Most State revenues require "fund accounting " and balance sheet accounts for each individual revenue.
	2901 Other State Revenue Default This code should be used for transactions when no fund source tracking is desired or required for the state revenue(s).
	<b>NOTE:</b> Call the State Department of Education to confirm when fund accounting must be maintained for any state revenue.
3000-5999	<b>FEDERAL SOURCES</b> This range of fund source codes should be used when federal revenues require "fund accounting". Most Federal revenues require "fund accounting " and balance sheet accounts for each individual revenue.
5101	USDA/Child Nutrition Source Default This code should be used for transactions when no fund source tracking is required for the USDA/Child Nutrition revenue(s).
5991	Federal Source Default This code should be used for transactions when no fund source tracking is required for the federal revenue(s). Most Federal revenues require "fund accounting" and balance sheet accounts for each individual revenue.
	<b>NOTE:</b> Call the State Department of Education to confirm when fund accounting must be maintained for any federal revenue.

9000-9997	OTHER FINANCING SOURCES This range of fund source codes should be used when "fund accounting" is desired or required for other financing revenue(s) source(s).

# APPROPRIATION YEAR COMPONENT SECTION - I

Revised: January 25, 2023

# **APPROPRIATION YEAR COMPONENT**

An appropriation year code is a one(1) digit code used in the component structure to identify and classify balance sheet, revenue and expenditure accounts by the grant and(or) appropriation year within the current fiscal year.

The major codes defined by the State are as follows:

Current Year Appropriations	0
LEA Carryover Appropriations	1
July - September (Federal) Appropriations	2
Prior Year State Appropriation Encumbrances	9

### DEFINITIONS AND PROCEDURES FOR APPROPRIATION YEAR CODES

Appropriation year codes are used in conjunction with the fund source code to identify the appropriation year, grant year and(or) fiscal year to which the account or transaction is to be reported. The primary objective of this code is to provide a means of reporting state and federal grants by appropriation year. This is especially valuable when multiple appropriation and grant year transactions occur within the same fiscal year.

All balance sheet, revenue, and expenditure transactions must reference the appropriate fund source and appropriation year code from the charts listed in this manual. Most accounting transactions will reference the current fiscal year appropriations code. However, special revenue fund transactions in which most federal grant programs are maintained must use the appropriate grant year code if the transaction relates to a carryover or prior year appropriation.

#### **Current Year Appropriations:**

Appropriations of grant funds obligated during the fiscal year October through September of the first year of availability.

#### **LEA Carryover Appropriations:**

Appropriations of grant funds or other project resources with a life of two consecutive years that is carried over by school systems and accounted for in the second year of availability.

#### July-September Federal Appropriations:

Appropriations of grant funds which become available July 1 of each year and are obligated from July through September prior to the beginning of the school systems' fiscal year.

#### **Prior Year State Appropriation Encumbrances:**

State appropriations encumbered during the year in which funds were available and actually become expenditures in the following fiscal year.

# PROGRAM CODE COMPONENT

**SECTION - J** 

Revised: January 25, 2023

## **PROGRAM CODE COMPONENT**

A program is a plan of activities and procedures designed to accomplish a predetermined objective or set of objectives. The program code component allows local education agencies to charge program costs, instructional and support, directly to the benefiting program. For example, special education transportation costs are recorded to the support services function "Transportation", even though they should be charged directly to the Special Education program. For "Regular Education" programs, this component allows for costs to be recorded by grade level or subject areas.

The four(4) digit program code in the accounting system will identify the following major categories:

NO PROGRAM CODE REQUIRED	0000
INSTRUCTIONAL PROGRAMS	1000-7999
REGULAR EDUCATION PROGRAMS	1000-1999
SPECIAL EDUCATION PROGRAMS	2000-2999

### DEFINITIONS OF SPECIAL USE CODES

0000	NO SPECIAL USE CODE NECESSARY When no special use code is needed to identify or further breakdown any of the other components, use "0000" as the default in this field.
0001-0099	<b>STATE DEPARTMENT OF EDUCATION USE</b> In order to maintain the integrity of each of the other components of the accounting system, the State Department of Education is reserving the first ninety-nine(99) of the special use codes to identify special tracking and reporting requirements that are best accomplished by the use of this component.
0001-0019	<b>Classroom Instructional Support</b> Because of the budgeting requirements outlined by the legislature for classroom instructional support, this group of special use codes is set aside to give the school systems a tool to budget and accumulate transactions for reporting purposes.
0020-0049	Matching Because of the matching requirements of certain funding sources, this group of special use codes is set aside to give the school systems a tool to budget, accumulate transactions and report the transaction required for matching.
	<b>Note:</b> Matching from other resources not recorded in the school systems' general ledger will require a separate report.
0050-0099	<b>State Special Use</b> Because the State Department of Education desires to automate as many required reports as possible, this group of special use codes will be used for this purpose.
0100-9999	LOCAL SCHOOL SYSTEM USE Use these special use codes to further breakdown any of the other components or identify transactions that the school system may desire.
NOTE: The fo	ollowing additional grouping of special use codes is not required but is being

**NOTE:** The following additional grouping of special use codes is not required but is being recommended to assist in any future conversions or mass changes that can be performed by your software provider.

0100-6999*	Local Educational Agency optional use Use this group of special use codes to further breakdown any of the other accounting system components when greater detail is desired by the LEA.
7000-7999*	Local School Accounting Activity Codes Use this group of special use codes to incorporate the activity accounting function into the central office's general ledger system.
8000-8999*	Interfund Transaction Designator Use this group of special use codes to designate the transactions that occur between fund types, fund sources or other accounting components that will be helpful during reconciliation.
9000-9999*	Payroll Deduction Designators Use this group of special use codes to designate the deduction setup in the payroll system and in the general ledger system. This designator will be helpful during reconciliation between amounts deducted, the amounts setup as payable in the general ledger and the amounts appearing on payroll vendors' billings.
